

## ABSTRACT OF THE DISCLOSURE

5 A disclosed gaming machine has a memory storing a list of one or more prizes, a prize display for viewing prize information, and a prize selection mechanism that allows a user playing a game on the gaming machine to select one or more prizes specific to one or more outcomes of the game played on the gaming machine. One or more gaming machines may be connected in a "prize distribution network" to a "prize server." The prize server may include an interface for providing prize information to  
10 the gaming machines connected in the prize distribution network and a memory storing the prize information as groups of prizes for separate display on the gaming machines. With the prize server and prize distribution network, the prizes available as an award on each gaming machine in the prize distribution network may be easily changed.
